Information Technology Student
Saudi Arabia | [linkedin.com/in/nouf-alqurashi-22255a2a2](https://www.linkedin.com/in/nouf-alqurashi-22255a2a2)

SUMMARY

Information Technology student (expected graduation 2026) with hands-on experience in mobile application development, Firebase, and API integration. Currently developing TAYAQAN, a food-safety app built with Flutter and Firebase, seeking cooperative training to apply and grow these skills in a professional environment.

EDUCATION

Bachelor's Degree in Information Technology — Saudi Electronic University, Saudi Arabia
GPA: 3.35/ 4.00
Expected Graduation: 2027 | Language of Instruction: English

PROJECTS

PORTFOLIO: noufal-q.github.io

TAYAQAN – Food Safety Mobile Application | *Graduation Project — In Active Development*
Technologies: Flutter & Dart, Firebase, Cloud Functions (Node.js), NoSQL (Firestore), REST APIs (SFDA, FDA, OpenFoodFacts)

- Developed a food-safety mobile app enabling users to scan or search products and receive instant allergen analysis, recall alerts, and AI-powered product recommendations.
- Built the backend on Firebase with Cloud Functions, integrating SFDA, FDA, and OpenFoodFacts APIs to retrieve product and recall data.
- Integrated AI-powered recommendations to suggest safer product alternatives tailored to each user's health profile and allergen preferences.
- Designed the Firestore database structure and tested system workflows to improve reliability and data accuracy.

SKILLS

Technical: Firebase, Cloud Functions, NoSQL (Firestore), REST API Integration, Mobile & Web Application Development, System Analysis

Programming: Python, JavaScript, Dart (Flutter), Java, HTML, CSS

Professional: Problem Solving, Teamwork & Collaboration, Time Management, Attention to Detail, Quick Learning

LANGUAGES

Arabic: Native Speaker | **English:** Professional proficiency in reading and writing; conversational speaking skills

AVAILABILITY

Expected to graduate in 2027 after completing the cooperative training program.
